Award Winning Calibration Services

Lester Salvatierra
First US Finance
805-217-9896

Lester,

It has been several months since we closed our loan and I am still overwhelmingly proud that we did business together.

In twenty years of running my business, I have come across numerous lenders and banks all promising money for our projects. What they all failed to do was following through and providing communication and actions commensurate with their promises.

You worked with us every step of the way, building a strong document case for us for your underwriting process.

When we had our grand celebration in Palmdale, you drove from Moorpark all the way to attend. No other lender would ever consider such an action. Dedication and perseverance are your trademarks.

I am whole heartedly thanking you in our solar project as it could not have been achieved to the level of greatness had it not been for you and First US Finance.
