

Equipment and Project Financing

Background

First US Finance LLC was formed in 2011 and is an equipment financing company created to fill the gap left by commercial lenders. Supported by our funding partners we help private companies, non-profit groups and municipalities finance equipment and projects throughout the United States. We are an innovative business lender, based in California, with expertise in the manufacturing, technology and energy markets. We offer commercial equipment loans, capital leases and working capital loans for growing entities and approve them more quickly and effectively than traditional lenders. In addition to equipment financing, we offer a wide variety of business lending solutions.

Core Services

Commercial Equipment Financing, Capital Leases & Loans

We offer equipment financing and loan programs from \$20,000 to multi-million dollar projects with standard terms from 3 to 7 years. Available are capital finance leases and loans, with complete ownership at the end of the term. Project financing can be made to include multiple vendors for projects built in several phases.

Vendor & Distributor Programs

We provide tailored vendor and distributor programs to companies selling their products to other businesses (B2B). We partner to become a virtual in-house finance department, allowing vendors to offer finance options with each quote or proposal. The program includes branded forms and training. By offering credit terms to the buyer, the vendor's profit increases greatly while providing a complete solution to their client.

Special Projects and Asset-Based Financing including PPAs and Aircraft Finance

We specialize in financing all energy systems like solar and LED lighting equipment with terms from 3 - 10 years at low rates. Power Purchase Agreements (PPAs) are available from 20 - 25 years for larger solar projects. We provide asset-based financing for companies wanting to leverage current equipment into a capital loan, invoice factoring for converting receivables into cash and working capital loans for immediate business needs. Our aircraft finance offers 5 - 20 year terms with low rates for personal and commercial use within the U.S.

Typical Equipment & Projects Financed

Commercial Solar
