Background

First US Finance was formed in 2010 as an inspired commercial equipment financing company designed to fill the gap left by commercial lenders by making capital more easily available for all types of businesses and equipment. We offer equipment financing, commercial loans, project financing, collateral loans and start-up financing for all size companies throughout the United States. We approve them more efficiently than traditional lenders with no upfront fees nor large deposits. Our process requires minimal paperwork while offering streamlined credit review for fast results. We provide personalized service tailored to your needs along with a variety of lending solutions to meet all business expansion goals.

Core Services

Commercial Equipment Financing, Capital Leases & Loans

We offer equipment financing and loans from $10,000 to multi-million-dollar projects with standard terms from 3 to 7 years. We provide capital finance leases and loans, with complete ownership at the end of the term. Project financing can be structured to include multiple vendors for projects built in several phases.

Vendor & Distributor Programs

We provide tailored vendor and distributor programs to companies selling their products to other businesses (B2B). We partner to become a virtual in-house finance department, allowing vendors to offer finance options with each proposal. The program includes branded forms and training. By offering credit terms to the buyer, a vendor's profit margin increases greatly while providing a complete solution for their client.

Special Projects and Asset-Based Financing including PPAs and Aircraft Finance

We specialize in financing all types of energy systems like solar, battery production and LED lighting equipment with terms from 3 - 7 years at competitive rates. Our aircraft finance loans provide 5 – 20-year terms with low rates for commercial use.

Typical Equipment & Projects Financed

Construction Equipment
Industrial Machines
Commercial Solar
Medical Equipment
Commercial Real Estate
Vocational and Transport Vehicles
Heavy Machinery
Aircraft for business and personal
Theater Video, Audio and Software systems
Restaurant and Food Service Equipment
